PROFESSIONAL SUMMARY

Incident response engineer with enterprise IR experience in a global SOC (AXA Group) and a proven build record in AI-driven security automation. Hands-on with Microsoft Sentinel, KQL/Azure Data Explorer, Cybereason EDR and Google SecOps SOAR; investigations mapped to MITRE ATT&CK. Designed and shipped a multi-agent AI investigation platform (LangChain/LangGraph) that cut MTTR by 70% and automated 85% of L1 triage. SC-200 and CompTIA Security+ certified. Targeting L2 SOC / incident response / detection engineering roles.

PROFESSIONAL EXPERIENCE

Incident Response Analyst (Internship) — AXA Group Business Services, Global SOC Feb 2026 – Aug 2026

Rabat, Morocco — 24/7 global security operations covering AXA entities worldwide

- Triage, investigate and respond to security incidents across a global enterprise estate using Microsoft Sentinel, Azure Data Explorer (KQL), Cybereason EDR and Google SecOps SOAR.
- Led investigation of a brute-force intrusion on NetApp ONTAP storage involving backdoor account creation; reconstructed the attack timeline from authentication logs and mapped findings to MITRE ATT&CK for containment and reporting.
- Performed endpoint threat triage (e.g., suspicious rundll32.exe execution chains), distinguishing malicious activity from legitimate administrative tooling through process-tree and parent-child analysis.
- Developed custom KQL detection and investigation queries over large-scale enterprise log tables (sign-in, EDR and custom telemetry) to accelerate alert validation and threat hunting.
- Documented incidents end-to-end in AXA's incident management platform, aligned with enterprise IR playbooks and escalation procedures.

AI & SOC Automation Engineer (Fixed-Term Contract) — Sekera / VinciLogic

Apr 2025 – Sep 2025

Casablanca, Morocco — Detection & Response automation platform

- Built “VinciLogic”, an AI-powered SOC automation platform using multi-agent architecture (LangChain/LangGraph) for autonomous alert investigation across TheHive, OpenSearch SIEM and Microsoft 365.
- Implemented automated phishing analysis (OCR, sandbox detonation, IOC enrichment) with multi-source intelligence: VirusTotal, AbuseIPDB, Microsoft Graph API.
- Delivered MITRE ATT&CK-aligned automated investigation reports for analyst review and escalation decisions.
- Results: 70% reduction in MTTR, 85% of L1 triage automated, zero false-positive escalations to L2.

EDUCATION

State Engineer Degree (Diplôme d'Ingénieur d'État) — École Mohammadia d'Ingénieurs (EMI) Sep 2023 – Jun 2026

Rabat, Morocco — Network & Cybersecurity Engineering (5-year engineering track; Master's-level equivalent)

Preparatory Classes (CPGE), MPSI — Lycée Mohammed V

2021 – 2023

Casablanca, Morocco — Intensive mathematics, physics and engineering sciences program

CERTIFICATIONS

- Microsoft Certified: Security Operations Analyst Associate (SC-200) — 2026
- CompTIA Security+ (SY0-701) — 2024
- Cisco CyberOps Associate — 2025
- AWS Cloud Practitioner Essentials — 2024;
- LetsDefend SOC Analyst Path — 2024

SELECTED PROJECTS

Integrated SOC Detection Lab

- Deployed a full SOC stack — Security Onion (NSM), Wazuh (SIEM/EDR), TheHive/Cortex (case management, IOC enrichment) and n8n (SOAR orchestration) — for end-to-end automated detection, analysis and response.

SOAR & EDR Automation Pipeline

- Built an automated detection-and-response workflow with LimaCharlie (EDR) and Tines (SOAR), including Slack and email alerting.

Purple Team Lab — Active Directory & Splunk

- Configured an Active Directory domain, simulated attacks from Kali Linux, and analyzed defensive telemetry in Splunk.

TECHNICAL SKILLS

- **SIEM & Detection:** Microsoft Sentinel, Azure Data Explorer (ADX), Splunk, Wazuh, OpenSearch, Elastic Stack, Sysmon
- **EDR & Endpoint:** Cybereason EDR, Microsoft Defender XDR, LimaCharlie
- **SOAR & Incident Response:** Google SecOps SOAR, ServiceNow SIR, TheHive/Cortex, n8n, Tines
- **Threat Intelligence & Analysis:** MITRE ATT&CK, VirusTotal, AbuseIPDB, Shodan, Any.Run
- **Scripting & AI:** Python, KQL, Bash, LangChain/LangGraph, LLM agent design, Ollama, prompt engineering
- **Network & Infrastructure:** Wireshark, Active Directory, Microsoft Entra ID, Tenable Nessus, FortiGate
